### NASCUS Webinar Series for Directors

These challenging economic times have sharpened the focus on the need for financial education about the proposed and current regulatory and compliance changes impacting credit unions. NASCUS invites you to a webinar series specifically for Directors looking to increase their knowledge and skills in governing their credit unions within today's regulatory environment.

*“For Boards of Directors, there is no better time then now to increase your education and awareness on consumer protection laws and regulations to assure compliance with regulators and maintain commitment to your members.”*

**Linda Jekel, Director of Credit Unions**

Please join in on either one or both of the upcoming insightful webinars to gain more knowledge and confidence about your responsibilities as Boards of Directors:

#### **NASCUS September Webinar, Series for Directors**

**September 9 and October 5**

**\$149 each (including recording) or \$249 for both**

**[Register Here](#)**

#### **CRITICAL COMPLIANCE ISSUES FOR BOARD MEMBERS by Bill Klewin**

**Thursday, September 9, 2010 - 1:00pm Eastern**

During this webinar, Bill Klewin will update attendees on the current and proposed regulatory and compliance changes impacting credit unions. Bill will also identify directors' essential "need to knows" about the impact of today's regulatory environment on your credit union management.

#### **A FOOLPROOF BOARD OF DIRECTORS by Frank Drake**

**Tuesday, October 5, 2010 - 1:00pm Eastern**

Credit Unions are governed by Boards of Directors, not by their presidents, CEOs, or staff. Too many members of Boards misunderstand their responsibilities and the legal requirements imposed by state laws and regulations. During this session, Frank Drake will provide information that will help Board members to do their jobs, follow the law, and avoid the risk of personal liability.
